DEVIN MULLIN

(504) 390-1404 / [Website](#) / [Github](#) / [LinkedIn](#) / [Email](#)

FULL-STACK DEVELOPER:

Creative, ambitious developer with 7+ years of tech experience in multiple roles

TECHNICAL SKILLS:

JavaScript, React, HTML, CSS, Ruby, SQL, PowerShell, Rails, Postman, three.js, Sinatra, SQLite, ActiveRecord, JIRA, Ubuntu, Git, Windows Server

TECHNICAL PROJECTS:

DEVYLEAGUE FANTASY BASKETBALL / [Demo](#) / [Frontend](#) / [Backend](#)
Full-stack app (React / Rails) that allows users to create a fantasy basketball team
- Incorporated Redux Toolkit for state management (adding/removing players from user teams)
- Styled frontend with React-Bootstrap to create an elegant and nostalgic UI
- Designed Rails/SQLite 3 backend with the future in mind (including self-referential tables for league creation), using JWT and localStorage to store encrypted user information client-side
- Utilized the YouTube API to dynamically render highlight videos on individual players' profiles
- Roadmap includes trade logic, league creation, and a web scraper for live scores / injuries

REACT-IONARY (with Scott Donnan) / [Website](#) / [Frontend](#)
React app that allows users to search the Merriam-Webster Dictionary and favorite words
- Parsed the Merriam-Webster API for word definitions/synonyms/pronunciation audio
- Improvised user login / favorite system with state and project JSON files acting as the backend

EXPERIENCE:
